Dear Parents/Carers,

Chilton will be participating in the NSPCC Number Day, 2020. The school will come together on **Friday 7th February** to raise money for the NSPCC whilst having fun with maths at the same time. Other than a range of exciting activities that the teachers have planned for the day, we are also inviting the children in **Reception and Key Stage One** to come in dressed up in anything maths related.

Ideas include a t-shirt decorated in number calculations; a mathematical symbol; wearing a football shirt; a calculator or any other creative ideas you may have! To raise money for the NSPCC, we are suggesting a voluntary donation of £1.

The Ks1 maths challenge for Term 3, tasks the children to create their own maths game on a maths skill they have learnt so far this year. There will be an opportunity to play these games on Number Day so if they choose to do this challenge, they must be in school by **Friday 7th February**. If the children haven't completed this, there will be other maths games available for them to play.

In addition to the maths themed activities, there will be a maths themed cake sale! This will take place at break time and after school outside the Year 5 Classrooms (weather permitting).

All money raised will be donated to the NSPCC (<https://www.nspcc.org.uk>) in hopes to give as much as we can to children that are in the most need around the world.

Kind regards,

Miss Lane
Maths Leader

One Childhood One Chance
