

Week 1 FRIDAY 27.03.2020

IALT solve a problem - All levels

Use this maths lesson to solve a problem. You can present your learning in your maths book or on large pieces of paper (like we do in class). You can work with your family or even challenge your sibling!

## Highest and Lowest

**Age 7 to 11 ★**

Put operations signs (+ or − or  $\times$  or  $\div$ ) between the numbers 3, 4, 5, 6 to make the highest possible number and lowest possible number.

How about trying with numbers 1, 2, 3, 4, 5 and 6?
