

## I am learning to measure length

When you are measuring shorter objects (e.g. pencil, rubber, cup), you could use your finger:

Object	Length
Pencil	15 fingers

What was the shortest object you measured with your finger? \_\_\_\_\_

What was the longest object you measured with your finger? \_\_\_\_\_

When you are measuring longer objects (e.g. length of the garden, width of your house), you could use your feet:

Object	Length
Garden	56 feet

What was the shortest object you measured with your feet? \_\_\_\_\_

What was the longest object you measured with your feet? \_\_\_\_\_

Which body part was it easier to measure with?

\_\_\_\_\_
