I am learning to plot coordinates in four quadrants

These coordinates are to be plotted on a grid with four quadrants.
The same rule applies:
Along the corridor (x axis) first
Up or down the stairs (Y axis) next.

Coordinates

1. (-7,-6) (-7,-7)	12. (5,3) (3,5)	23. (-6,6) (-1,6)	34. (-9,3) (-3,-4)
2. (-7,-7) (4,-7)	13. (3,5) (1,5)	24. (-1,6) (-1,5)	35. (-3,-4) (-4,-6)
