I am learning to investigate measurements

Today we would like you to investigate the heights of different animals. Last week's English made you familiar with several wild animals.

- List 10 wild animals
- Estimate their height
- Research what their average height is, record it.

Complete a table

Animal	Estimate	Actual average height
Tiger	90cm	1.1m

- You could sketch the animals in height order and record their heights
- You could create a height bar chart using the animals as the bars.
- Cut out pictures of the animals and record their heights.
