

Learning Reminders

Read time on analogue clocks to nearest quarter hour.

The circle is divided into quarters. It is a bit like a clock face. Let's put 12 at the top.

3 is a $\frac{1}{4}$ of the way round the clock face. When the minute hand is here, it is $\frac{1}{4}$ of an hour past an o'clock time.

6 is at $\frac{1}{2}$ way round the clock face. When the minute hand is here, it is $\frac{1}{2}$ of an hour past an o'clock time.

When the minute hand is at 9, it has $\frac{1}{4}$ of an hour to go until the next o'clock time.

Read time on analogue clocks to nearest quarter hour.

It's 9 o'clock. On this clock the pink tells as 'past' times and the blue tells us 'to' times.

Read time on analogue clocks to nearest quarter hour.

Now it's $\frac{1}{4}$ of an hour after 9 o'clock. We can write that as quarter past 9 or $\frac{1}{4}$ past 9.

Read time on analogue clocks to nearest quarter hour.

Now it's only $\frac{1}{4}$ of an hour before 10 o'clock. We can write that as quarter to 10 or $\frac{1}{4}$ past 10.
