I am learning to solve problems with money

Friday fun day! Have a go at this maths game adding and subtracting amounts of money and finding the correct change.

Then see if you can solve the problem below (Charlie's Money)

Going Shopping Problem Solving

Shopping activities which will get your brain working! You have to decide which items to buy for your money.

Charlie's Money

Charlie spent $\frac{1}{4}$ of his money on a book, gave his brother $\frac{2}{3}$ of what was left, and still had £9 remaining.

How much money did he start off with?
